(3) Adhesive Mounts

TOP VIEW

For Items 14817 / 14818 / 14819:

(4) Adhesive Mounts

TOP VIEW

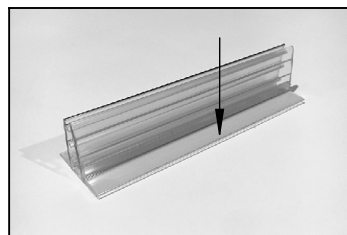

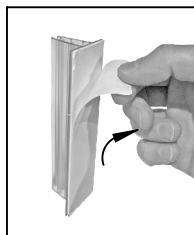

****NOTE:** Before applying the adhesive mounts, ensure the surface you are mounting them to is dust-free, thoroughly cleaned, and dry. The adhesive mounts ARE NOT REPOSITIONABLE. Please make sure you are satisfied with the positioning and location before applying. After applying the adhesive mounts to the surface, let them cure for 24 hours before installing the Shield Panel. Ultimate adhesion strength will be achieved after 72 hours.

Multi-Purpose Shield with Adhesive Mounts

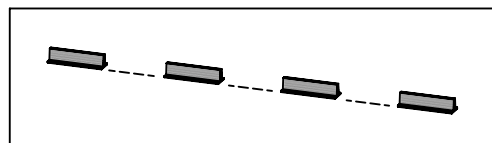

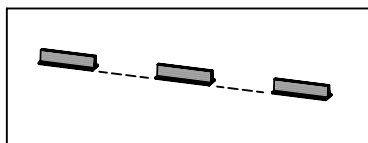

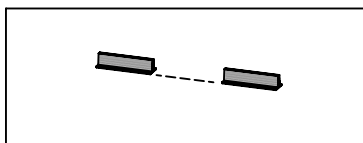

ASSEMBLY INSTRUCTIONS

READ ALL INSTRUCTIONS BEFORE YOU BEGIN. DO NOT JUMP AHEAD OF ANY STEP.

STEP 1: After ensuring mounting surface is clean, peel off the paper backing from the bottom of one of your Adhesive Mounts and apply Mount to surface in desired location. Firmly press down on Adhesive Mount.

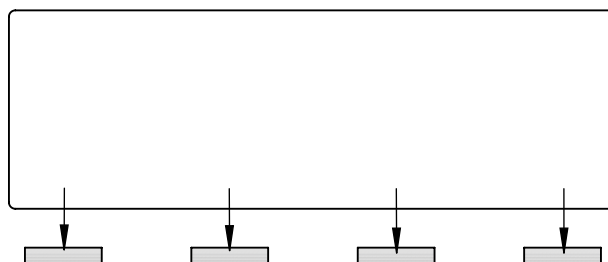

STEP 2: Repeat STEP 1 to install remaining Adhesive Mount(s), following spacing as noted on Page 1 and making sure Adhesive Mounts are aligned in a straight line.

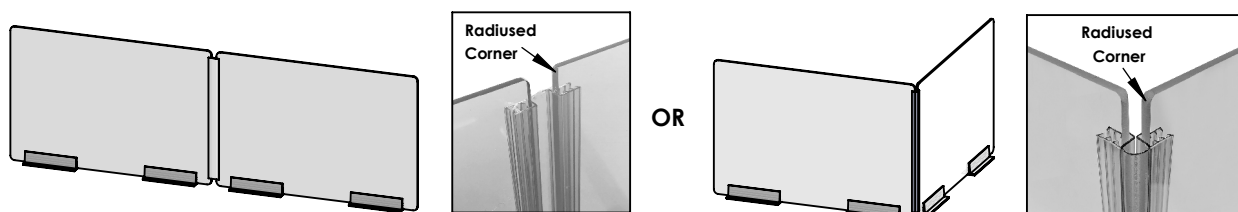

****REMINDER:** Adhesive Mounts are **NOT** repositionable, so make sure you are happy with placement before applying. Also, after applying Adhesive Mounts to mounting surface, let them cure for 24 hours before installing the Shield Panel. Maximum adhesion strength will be achieved after 72 hours.

STEP 3: Peel off the protective plastic film from both sides of Shield Panel. Carefully guide Shield Panel down into installed Adhesive Mounts, centering the Panel from left to right within the Mounts.

ASSEMBLY COMPLETED

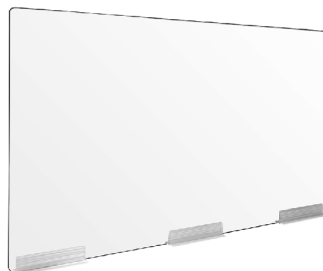

NOTE: To connect multiple Shields together, use the supplied Flexible Connector and attach one half to the open side edge of installed unit, and the other half to the side edge of an adjacent Shield. Shields can be connected side-by-side or Connector can be flexed to form an L. **Make sure when installing to start below the radiused corners of your Panel.**
